May 8th – 11th, 2013
Hannover Congress Centrum
What could excellence in medicine look like?

A heritage built upon helping protect and preserve vision.
A commitment to advancing medical aesthetics.
A solution to help fight obesity.
A desire to help people move more freely.
A dedication to enabling people to live life without compromise and to their fullest potential.

It would look like Allergan.

Founded in 1950, Allergan, Inc., with headquarters in Irvine, California, is a multi-specialty healthcare company that discovers, develops and commercialises innovative pharmaceuticals, biologics and medical devices that enable people to live life to its greatest potential.

To find out more about Allergan, visit www.allergan.co.uk

Therapeutic indications:

For the symptomatic treatment of blepharospasm, cervical dystonia of a predominantly rotational form (spasmodic torticollis) and of post-stroke spasticity of the upper limb presenting with flexed wrist and clenched fist in adults. For full information please refer to the XEOMIN® SmPC.¹

Undesirable effects:

May occur from misplaced injections or large doses of Botulinum neurotoxin type A that temporarily paralyse nearby muscle groups or muscles distant from the injection site. Usually, undesirable effects are observed within the first week after treatment and are temporary in nature. Restriction to the area around the injection site (e.g. local pain, tenderness at the injection site, and injection site haemorrhage) is possible. Localized pain, inflammation, paraesthesia, hypoesthesia, tenderness, swelling/oedema, erythema, localized injection bleeding and/or bruising may be associated with the injection. Needle-related pain and/or anxiety may result in vasovagal responses, including transient symptomatic hypotension and syncope. Blepharospasm

Undesirable effects (XEOMIN®): Common (≥1/100, <1/10): ptosis, dry eyes. Uncommon (≥1/100, <1/10): paraesthesia, headache, conjunctivitis, dry mouth, skin rash, muscle weakness, inflicted injury. XEOMIN® contains: Clostridium Botulinum neurotoxin type A (150 kD), purified from cultures of Clostridium Botulinum (Hall strain), free from complexing proteins. Prescription-only medicine! Qualitative and quantitative composition: One vial contains: Clostridium Botulinum neurotoxin type A (150 kD), free of complexing proteins, 50 LD₅₀ units or 100 LD₅₀ units, Powder for solution for injection. Active substance: Clostridium Botulinum neurotoxin type A (150 kD; purified from cultures of Clostridium Botulinum (Hall strain)), free from complexing proteins. Five vials are presented at the 4th World Congress on Controversies in Neurology, 2010; Barcelona, Spain. html://www.comtecmed.com/covy/2010/uploads/assets/truong.pdf. 4. Chadda et al. EHP Practice. 2009; 15(6): 38 – 46.

The first and only botulinum neurotoxin product free from complexing proteins²:

- High sustained long-term efficacy leading to high patient satisfaction²,³
- Engineered for convenience and cost-effectiveness
  - Unopened XEOMIN® vials do not require refrigeration¹
  - XEOMIN® is proven to be cost-effective in patients with cervical dystonia and blepharospasm⁴

Merz Pharmaceuticals GmbH, 60318 Frankfurt/Main, Germany. Date of revision of the text: August 2012 Further information is provided in the Summary of Product Characteristics and in the Package Leaflet. Phone: ++49-69/1503-1
Invitation

Dear Colleagues,

Dystonias are amongst the most common movement disorders. Botulinum toxin and deep brain stimulation have revolutionized their therapy. However, there are still considerable unmet therapeutical needs.

This was the reason to organise the First International Congress on Treatment of Dystonia in the year 2010. The response was overwhelming: More than 450 participants from over 45 countries came to Hannover for an intense 3 day program.

With this encouragement we are now calling for the second congress of this series. With 3 years in between we believe there is now ample new data to discuss.

For the first time we are able to reach out to rehabilitation: The First International Conference on Rehabilitation of Dystonia will be incorporated as a pre-meeting satellite event.

We hope that this meeting will continue to serve as an open platform for all of us who want to collaborate for improving the future of patients with dystonias.

We are looking forward to welcoming you in Hannover in May 2013!

Best regards,

Eckart Altenmüller  
Dirk Dressler  
Joachim K. Krauss
Medtronic DBS Symposium

Shaping the future of Dystonia
How are 10 years of research and innovation leading us to the next level

Date: May 11th, 2013
Location: Hannover Congress Centrum (HCC)
Timing: 13:00 to 13:45
General Information

Congress Organisation
INTERPLAN Congress, Meeting & Event Management AG
Office Hamburg
Kaiser-Wilhelm-Str. 93
D-20355 Hamburg, Germany
Phone: +49 (0) 40 3250 9230
Fax: +49 (0) 40 3250 9244
E-mail: dystonia2013@interplan.de

Congress Venue
Hannover Congress Centrum (HCC)
Theodor-Heuss-Platz 1 – 3
D-30175 Hannover
Phone: +49 (0) 511 8113 0
Fax: +49 (0) 511 8113 429
E-mail: info@hcc.de

Congress Language
The official language of the Congress is English.

CME Certificate
An application has been submitted to the European Accreditation Council for Continuing Medical Education (EACCME) to provide accreditation for medical specialists. The CME Certificate will be supplied to participants on request.

Exhibition
An exhibition will be held during the Congress.

Abstract Submission
All participants of this congress are cordially invited to submit abstracts for oral presentations and / or poster presentations. Abstract acceptance will be notified from April 2nd, 2013.

Submission Deadline 18th March 2013
Please submit your abstract via this link: www.abstractserver.de/hhdyst2013/absmgm
